SKILLS

CODING LANGUAGES: JavaScript , React, HTML, CSS, Node.js, MongoDB, Express.js, Redux, Mongoose, Django, Python

SUMMARY

Completed coursework includes design analysis of algorithms, web development, and design analysis. Looking to join an engineering team that solves challenging problems and facilitates an environment to broaden technical skills in both front-end and back-end development.

PROJECTS

KSL Alerts **Sept. 2018 to Present**
KSL Alerts scrapes KSL's classifieds from a set of queries and pulls the data into the frontend to display to the user. Tools and languages we as a team used: JavaScript, React, Node.js, Express, Request, Cheerio, and MongoDB.

EXPERIENCE

Lambda School **Mar. 2018 to Present**
Full Stack Developer
Lambda School is an intensive 6 month Web Development curriculum that gives students practical skills in web development working with modern frameworks and a solid foundation of computer science.

Coeur Mining **Chicago, IL**
IT Support Technician **June 2016 to May 2017**
* Updated and revised IT policy and procedures
* Managed data migration from in-house servers to Microsoft SharePoint cloud services
* Collaborated on generating new ideas to increase user adoption.

Lead Sales Associate **Bloomington, MN**
2012 to 2014
* Selected to train and direct new hires in store policies and procedures
* Exceeded store Premier Rewards Program weekly projections of 5% with an increase of 7%
* Successfully implemented sales campaign "Bowtie Sundays" to promote men's accessories
* Effectively engaged with customers, receiving numerous customer and department awards
